Skin Tag Removal Post Care Instructions

- Keep the areas clean, washing with an antibacterial soap is recommended.
- Some localized redness, swelling and tenderness is expected after treatment. This may last up to 2 weeks.
- Apply a thin coating of the antibiotic ointment at least twice a day.
- More than one treatment may be necessary for larger skin tags.
- Bleeding and/or scabbing may occur if the area is disturbed following removal, with concerns or questions: Please call our office (408) 985-2900
